## Austin Industries

### THE COMPANY

Austin Industries is a diverse, merit-shop construction company owned 100 percent by its employees. The three operating companies of Austin Industries engage in almost every type of civil, commercial and industrial construction. The company's total workforce numbers about 5,800, and the completion value of projects in progress exceeds \$2 billion. Founded in 1918, Austin is one of the largest and most diversified construction organizations in the United States.

### AUSTIN BRIDGE & ROAD

Austin Bridge & Road, the oldest Austin company with headquarters in Irving, Texas. The company performs road and bridge construction for the public and private sector. It is also one of the area's leading producers of concrete paving for residential subdivisions and municipal projects. More than 200 Austin-built, pre-World War II steel truss bridges are still in service on the back roads of Texas.

### AUSTIN COMMERCIAL

Austin Commercial is a construction manager/general contractor with operations in Texas, California, Georgia, Arizona and Florida. The company has expertise in all types of commercial construction. Projects include corporate headquarters, sports facilities, health care, airports, schools and universities, and advanced technology (semiconductor plants, computer/data centers, call centers and customer service centers).

### AUSTIN INDUSTRIAL

Austin Industrial provides construction and maintenance services to the chemical, petrochemical, refining, power and manufacturing industries in the southern and southeastern U.S. The company has headquarters in Houston, Texas, and offices in Nederland, Texas; Baton Rouge, Louisiana; Mobile, Alabama; Augusta, Georgia; Spartanburg, South Carolina; and Alberta, Canada. The company has built a wide variety of petrochemical processing units, along with more than 80 fossil-fueled power plants that comprise a total generating capacity in excess of 15,000 megawatts.
